IndustrySafe Safety Management Software - The Industrial Hygiene Module of IndustrySafe Safety Software allows users to track and analyze industrial hygiene sampling including qualitative exposure assessments, area sampling, and personal monitoring. Agents can be tracked and recorded as well as Similar Exposure Groups.

Key Industrial Hygiene Features	
OSHA 1910 Subpart Z Compliance	Track exposure assessments of various hazardous substances.
OSHA 1910.1020	Easy access of exposure results and employee records
Easy to use data entry	Enter data quickly and easily with our Industrial Hygiene forms
Agent Database	Database of agents; ability to enter agent limits from multiple sources (i.e. NIOSH, OSHA etc.)
Area Sampling, Personal Monitoring, Qualitative Exposure Assessments	Track area sampling assessment and exposures, personal monitoring assessment and exposures, and qualitative exposure assessments
Similar Exposure Groups	Set up and trend by similar exposure groups
Risk Profile	Create Risk Profiles with exposure assessments
Controls	Track controls including ventilation, respirator, and personal protective equipment
Employee Information	Easy look up for employees (and contractors) for personal monitoring and qualitative exposure assessments
E-mail Alerts	Alerts to notify employees of exposure test results.
Industrial Hygiene Tracking Reports and Analysis	
Pre-canned Reports	Several pre-canned reports including area test results, personal monitoring, exposure assessment logs, and employee notification letter
Common IndustrySafe Safety Software Features	
Action Item and Hazard Follow Up	Allow for corrective action and hazard analysis controls based on monitoring and assessments
Add/Edit Fields	Add/Remove and edit fields on the agent form, similar exposure group form, personal monitoring, area sampling, and qualitative exposure assessment forms.
Supporting Documents	Link results, powerpoints, word, excel, photos etc to all Industrial Hygiene forms.
Export and Search Features	Search Industrial Hygiene forms easily and export search results to Excel
Multiple Locations, Users, Regions Etc.	Allow for entry by multiple users at multiple locations with business group, region, division, and corporate roll ups
Additional Module	Additional Module that can be purchased as an add on to the Core
