IndustrySafe Safety Management Software - Safety Inspections Module includes forms and pre-built checklists, enabling users to perform and track compliance rates of on-site safety inspections. Users can upload their own checklists or utilize existing pre-built checklists. Checklist items are linked to detailed OSHA regulatory standards from 29 CFR 1910 and 1926 and Voluntary Protection Program (VPP) Checklists.

Key Inspection Features

Use of Handhelds	Conduct inspections on web-enabled handhelds including smart phones and blackberries. Also available as a download for handheld devices without Internet access.
Easy to Use Form	Simple straight forward inspection form
Your Checklists or Ours	Upload your own inspections checklists or use our checklists. IndustrySafe checklist templates can be copied and edited and include OSHA 1926 and 1910 regulations
Scheduling Feature	Enables scheduling of inspections
E-mail Alerts	Automatic alerts to remind investigators and managers of upcoming and/or past due inspections

Inspection Reports and Analysis

Pre-canned Reports	Several pre -canned reports including inspection print outs, scheduled inspections, compliance and discrepancy rates
Dashboards	Several Dashboards such as Percent of Inspections Complete, Inspection Areas with Most Deficiencies

Common IndustrySafe Safety Software Features

Action Item and Hazard Follow Up	Allow for corrective action and hazard analysis follow up for inspections
Add/Edit Fields	Add/Remove and edit fields on the inspection form as well as the inspection checklist templates
Supporting Documents	Link photos, videos, PDFs, Word, Excel documents to inspection form
Compare Indicators across Modules	Dashboard module allows at a glance comparison of inspection indicators with other safety indicators
Export and Search Features	Search inspection data easily and export search results to Excel
Multiple Locations, Users, Regions Etc.	Allow for entry by multiple users at multiple locations with business group, region, division, and corporate roll ups
